Precise Control.

It's easier than ever before to find, play, and manage your music library using the HDL On app. Able to display everything you connect to HomePlay, the app lets you view your entire music collection, create playlists, play, pause, adjust volume, or skip tracks.

The app even lets you choose what room you want to listen to your music in. From a DubStep house party, to Spotify's best classical music while you cook, all the songs and albums you've collected can be played exactly as you intended.

Hear the Difference.

Designed to deliver crystal clear audio to every room in your home, HomePlay brings you a 40 watt amplifier with a dynamic range range of 87 decibels.

Whether you are listening to bass thumping music, or using your HomePlay system in conjunction with your home theatre, HomePlay lets you enjoy rich, high quality audio in every room of your home.

Stream different songs to every room in your home simultaneously.

The image shows a smartphone displaying the HDL app's 'Device List' screen. The screen is divided into four room-specific sections, each with a music player interface. A wireless signal icon is positioned between the phone and the room photos. The room photos are arranged in a 2x2 grid.

- Study:** Features a bookshelf, a window, and a blue armchair. The song 'Yesterday Once More' is playing.
- Living room:** Features a modern living area with a white sofa, a coffee table, and a staircase. The song 'Something just like' is playing.
- Bedroom:** Features a bed, a lamp, and a window. The song 'Yellow' is playing.
- Kitchen:** Features a modern kitchen with dark cabinets and a stainless steel oven. The song 'Let it go' is playing.
